Application language

Language used in the Power BI Desktop user interface, such as the ribbon and dialog boxes.

English (United States) ▾

Model language

Language used when comparing strings in data and for creating internal date fields. This only applies when a report is first created, and can't be changed on existing reports.

Use application language ▾

DAX separators

Specify the culture to use for list and decimal separators in DAX expressions:

- ☒ (Recommended) Use standard DAX separators: comma (,) as list separator and dot (.) as decimal separator
- ☐ Use localized DAX separators: list and decimal separators are defined by Windows locale settings
