

Power BI Desktop üzerinden Power BI Service kısmına geçerek resimlerdeki ayarları yapınız.

The image shows two screenshots of the Power BI ecosystem. The top screenshot is the Power BI Desktop application. The bottom screenshot is the Power BI Service web interface.

**Power BI Desktop Screenshot:**

- The top right corner shows the user profile for "Marcus Techproed" with the email "marcus@marcuspe.onmicrosoft.com". A red box highlights the "Power BI service" link.
- The main area displays "Add data to your report" with options: "Import data from Excel", "Import data from SQL Server", "Paste data into a blank table", and "Use sample data".

**Power BI Service Screenshot:**

- The top right corner shows the user profile for "Marcus Techproed" with the email "marcus@marcuspe.onmicrosoft.com". A red box highlights the "Power BI service" link.
- The main area shows "Recommended" reports and a table of recent items.
- The "Settings" menu is open on the right, showing "Governance and insights" with a red box around "Admin portal" and a red arrow pointing to it.

Map and filled map visuals

Enabled for the entire organization

Allow people in your org to use the map and filled map visualizations in their reports.

Enabled

By selecting "Enabled", you agree that map and filled map visuals may use Bing services located outside of your Power BI tenant's geographic region, compliance boundary, or national cloud instance. This feature uses mapping capabilities that are powered in part by third parties, TomTom and SK Telecom, and operate outside your tenant's geographic region, compliance boundary, or national cloud instance. Microsoft shares the address and location queries with these third parties, but not the name of the customer or end user who entered the query. This feature is non-regional and the queries you provide may be stored and processed in the United States or any other country in which Microsoft or its subprocessors operate. Use of map and filled map is subject to the following terms.
